Ask for players' emails to identify them. By enabling player identifier, you'll know the real person behind the nickname in your game. We'll track players' scores to their emails, names or another identifier of your choice.

Kahoot!

However, as Ivan Neretin's excellent answer pointed out, the major force is the Coulomb forces acting between oppositely charged ions $\$ \left(F_{\text{attract}} = \frac{q_+ q_-}{d^2} \right) \$$. Yet, the strength of these forces changes with other factors such as ionic character of the bond.

If you want an answer in feet per minute, make sure you're dealing with feet and minutes before you put it in the formula $fpm = rpm * \text{circumference}$ I think that's the easiest one to remember. And like BamaVib mentioned, the $1/\text{circumference}$ factor is the same one used in CSI in the equipment setup (it's the same math).
