First examples of systems with discrete and continuous time demon-strating essential coexistence, which are volume preserving, were con-structed in [HPT13,CHP13b,Che12] (see also [CHP13a] for a survey of recent results). Naturally, one would like to construct examples of systems with essential coexistence which are Hamiltonian. This is what

"The 'big book' [Atmospheric and Oceanic Dynamics Fluid] by Vallis is a treasure, but I suspect that this new 'Essentials' is destined to be used much more widely in classrooms. Vallis does a superb job of communicating the peculiar tensions between deductive reasoning and physical intuition that underlie this science.
