Seven muscles attach to the eyeball of domestic mammals (four recti, two obliques, and one retractor). The purpose of the retractor bulbi m. is to force the third eyelid across the surface of the cornea as a protective mechanism. Humans lack a third eyelid and a retractor bulbi m., and have only six muscles attaching...

Read Online Guide To The Dissection Of The **Lab Introductions**

This was the required dog dissection guide for my Gross Anatomy class last year. The diagrams are nice, the information is good, and it is a useful quick reference tool.

However, the dissection instructions are tedious and hard to understand at times (read them carefully). Overall I would recommend this book.
