### **Personhood, identity and care in advanced old age ...**

This book is an important and timely contribution for those interested in understanding the intricacies of personhood and care in advanced old age. Higgs and Giljeard are 'concerned with examining the nature of personhood and the place of care in both resisting and in realising the fourth age's imaginary' (p. vi, emphasis added). By further elaborating the social imaginary of the fourth age, the authors interrogate (the relevance of) abstractions, such as the ethics of care and ...

### **Higgs, P. and Giljeard, C. Personhood, Identity and Care in ...**

Abstract In many Western contexts, older age is imagined as a threatening part of the life course whereby personhood might become lost. This chapter investigates why that might be the case, and contrasts these assumptions with other cultural understandings of personhood and later life.

If an 'ageing society' is defined as one where at least 10% of the population is aged 65 years and above, the number of such ageing societies is projected to increase from 59 in 2010 to 138 in 2050 (UN, 2014). By 2050 the world will be home to some 1.5 billion people aged 65 and over, more agedness than the world has ever experienced.

### **Personhood, identity and care in advanced old age: Amazon ...**

If a person lived to an advanced age, it was due to genetic factors and/or a relatively easy lifestyle, since diseases of old age could not be treated before the 20th century. [160] In October 2016, scientists identified the maximum human lifespan at an average age of 115, with an absolute upper limit of 125 years. [14]

### **Personhood In Advanced Old Age**

This book explores the theoretical and practical issues raised by advanced aging in the contemporary world. Developing new sociological theory, Paul Higgs and Chris Gilleard suggest that mental and physical frailty forms a central theme in narratives about deep old age and that discussions of personhood are needed to address this concept.

### **Old age - Oxford Reference**

However, findings regarding old age are inconsistent. In particular, little is known about potentially moderating variables which might explain some of the inconsistency. Our aim was to examine the moderating effect of severe sensory impairment on cross-sectional and longitudinal associations between neuroticism and cognitive functioning.

### **Paul Higgs and Chris Gilleard (2016). Personhood, Identity ...**

An ill-defined age epoch for which euphemisms include retired persons, senior citizens, third age, and golden age. Vital statistics classify age-specific events in 10-year or larger categories, commonly 0 to 14 years, 15 to 44 years, 45 to 64 years, and 65+ years, and in this system, 65+ years is old age. Some geriatricians classify patients into groups each of roughly a decade, in which the ...

### **Old age - Wikipedia**

Although the oldest-old is a diverse population, advanced old age is associated with a greater risk of experiencing economic hardship, disabling illnesses or health conditions, and social isolation. A growing public policy challenge will be ensuring the economic well-being, the health, and the dignity of society's very oldest citizens.
