was 5 mb. North America is the continent with largest production of unconventional gas. The US production in 2006 was 161 bcm of tight gas, 51 bcm of CBM and 31 bcm of shale gas. Currently, there is no commercial production of gas hydrates. Development and production of unconventional oil and natural gas resources requires processes and

Denver Basin Oil and Gas Assessments - USGS

Production of oil and gas from unconventional resources commonly requires stimulation, and a good stimulation requires a rigorous analysis of reservoir quality and completion quality of the unconventional formation and an optimized completion design.

Unconventional oil - Wikipedia

Unconventional resources are resources, generally oil or natural gas resources, that do not appear in traditional formations and must use specialized extraction or production techniques to obtain fuel from the deposit.
